

# Amap User Guide

## Download and Registration

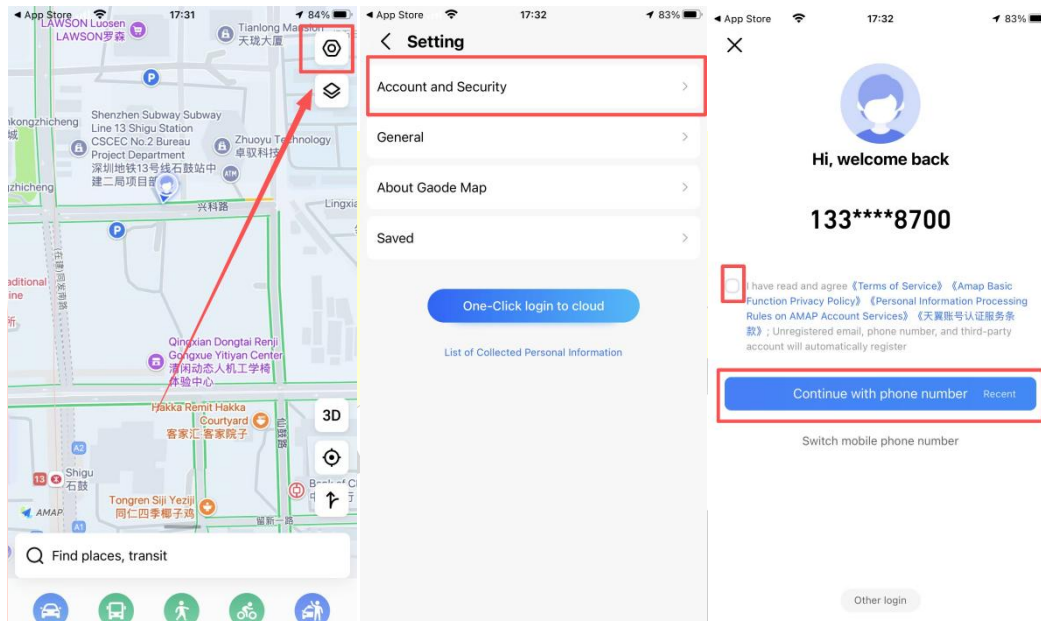

### 1. Search for 'Amap' in the app store, download and install it

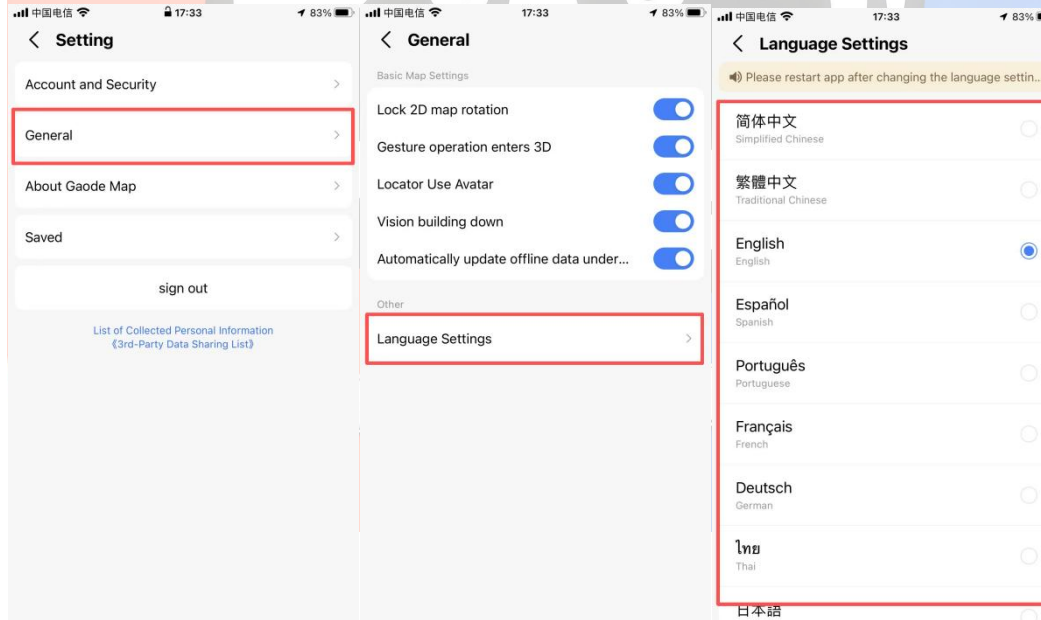

amap.go.app

## 2. Register an account

**Register with phone number:** Open the App, click Me at the bottom right, then at the top click Log in/Register; select Register, enter a Chinese phone number (86); click Get Code, and enter the SMS verification code.

You can choose different languages:

**Real-name authentication:** Daily navigation does not require real-name authentication; only taxi/rides, payments, and developer functions require real-name authentication (using a passport/residence permit)

## Detailed Explanation of Core Functions

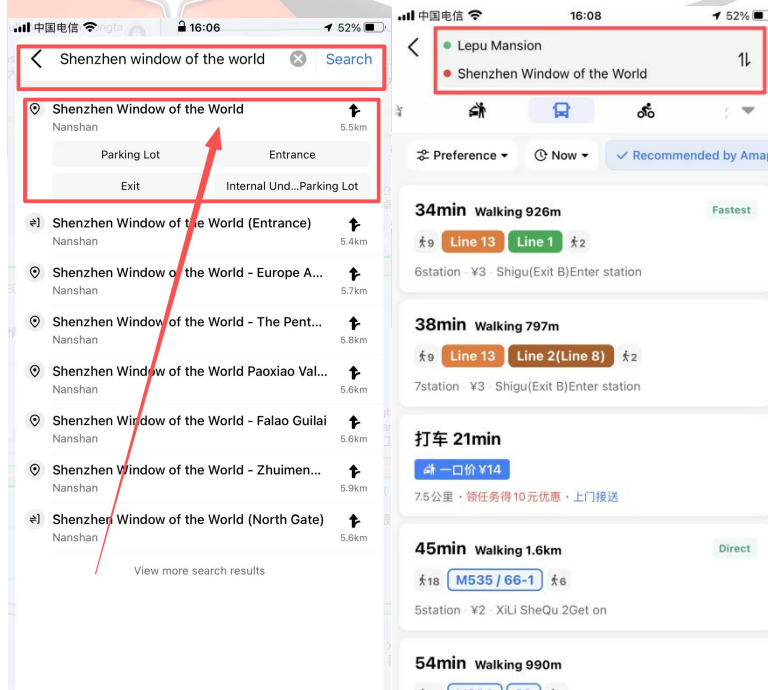

### 1. Route Planning (Most Commonly Used)

Entrance: Search Bar at the top of the homepage,Steps:

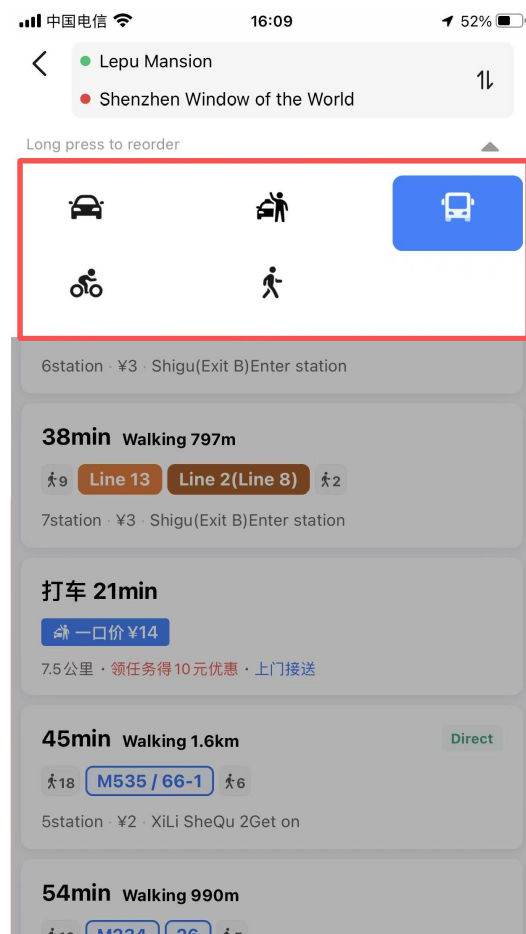

### 2. Enter From (starting point, default is current location), To (destination)

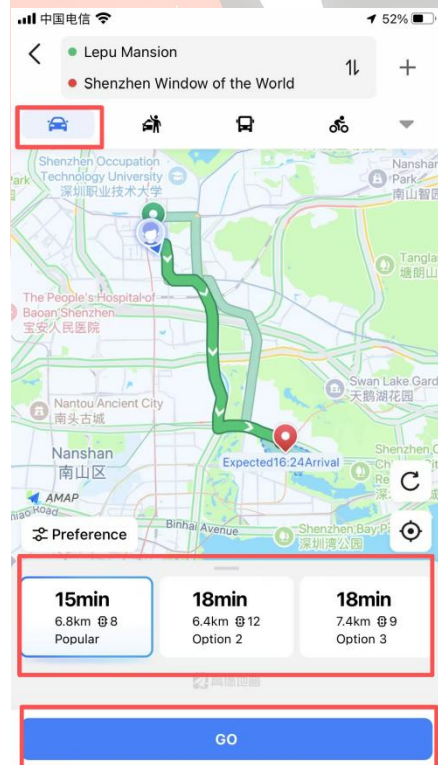

Supports: English / Pinyin / Chinese (e.g., Window of the World, Shijiezhichan, 世界之窗)

### 3. Choose the mode of travel:

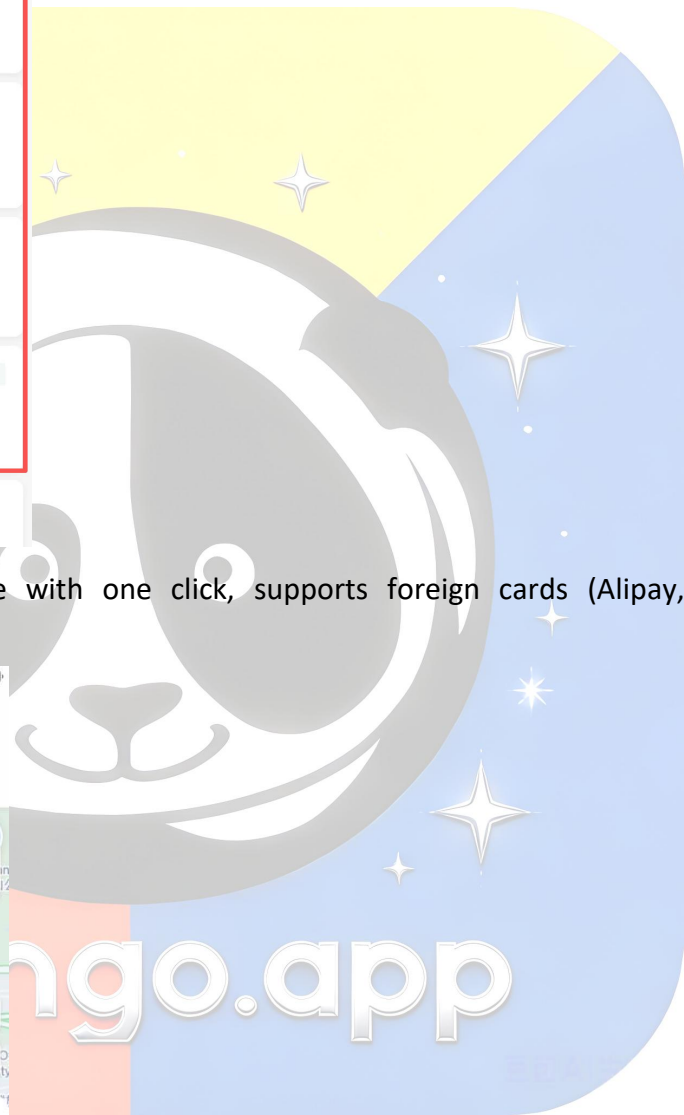

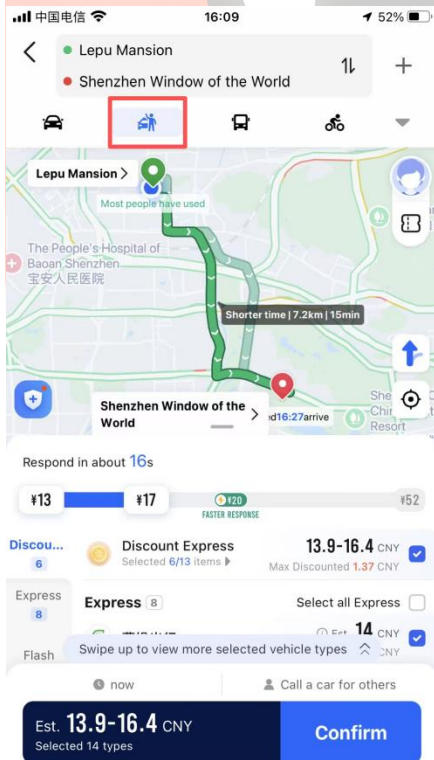

**Drive:** fastest route, avoid congestion, traffic lights / speed camera alerts

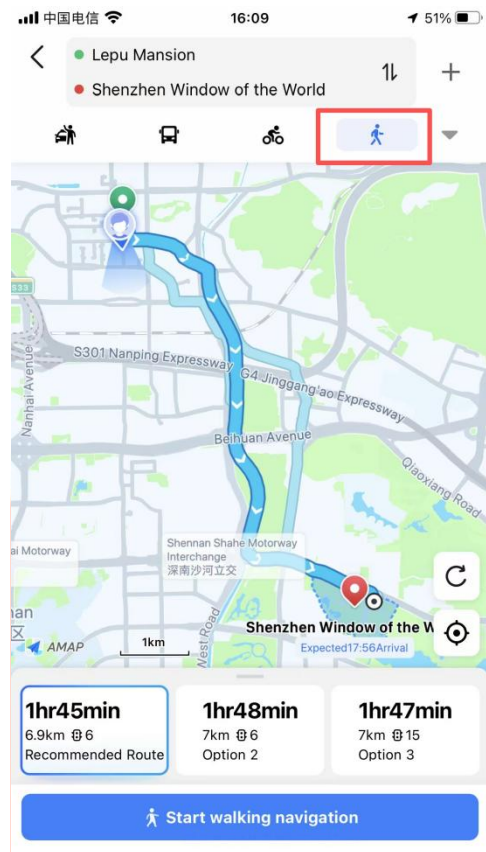

**Transit (Public Transportation):** Subway Bus Walking, including transfers, fares, duration, first and last departure times

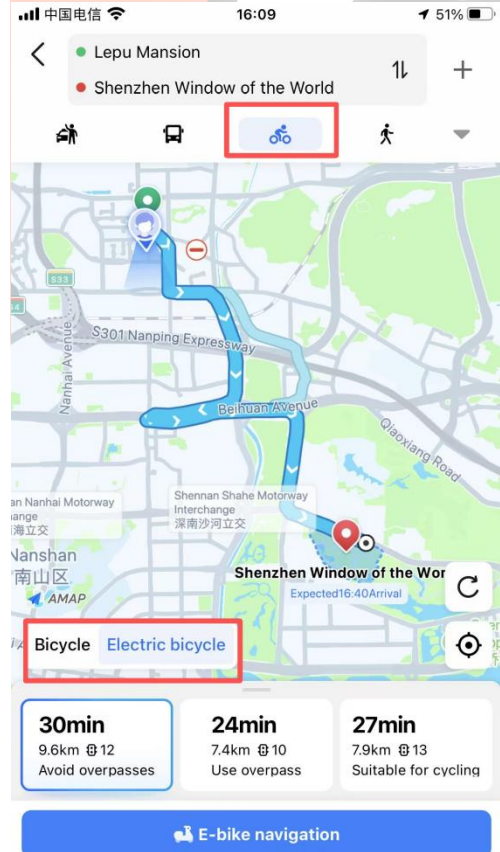

**Taxi (Ride-hailing):** Call a ride with one click, supports foreign cards (Alipay, Visa/Mastercard) for payment

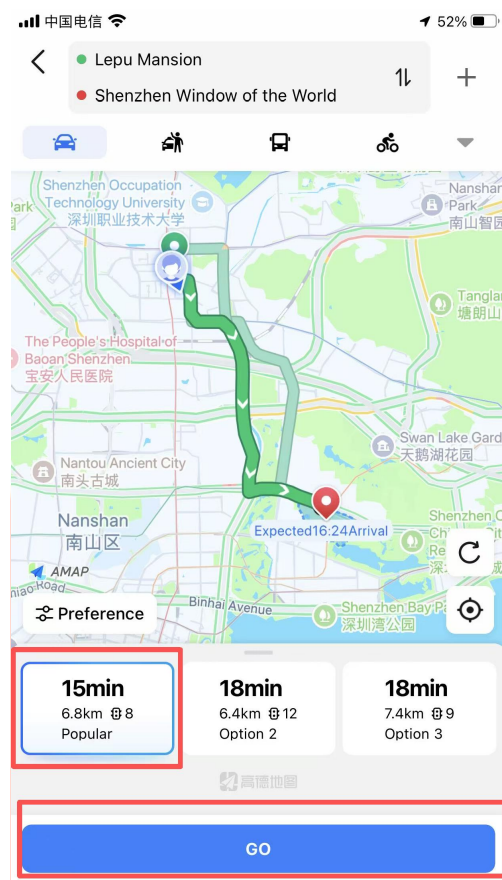

**Walk:** AR real-scene navigation, shortest path, street-crossing reminders

**Bike (Cycling):** Dedicated route for bicycles / electric bikes

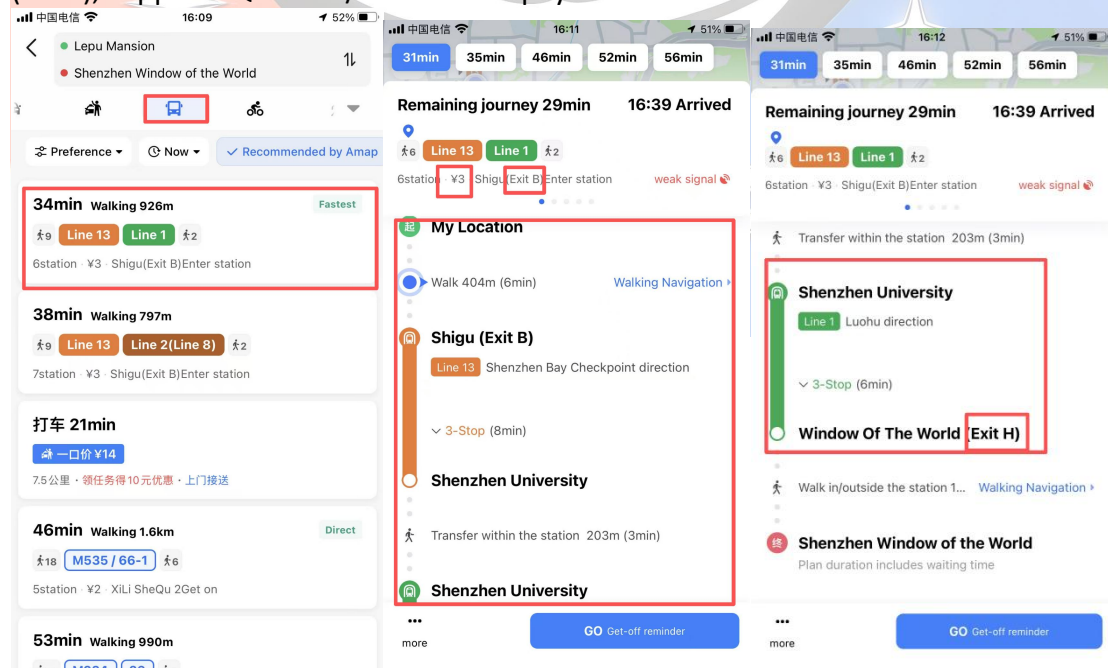

## 5. Click Start Navigation; Full English voice guidance and on-screen directions

## 6. Subway / Bus Navigation (Frequently used by foreigners)

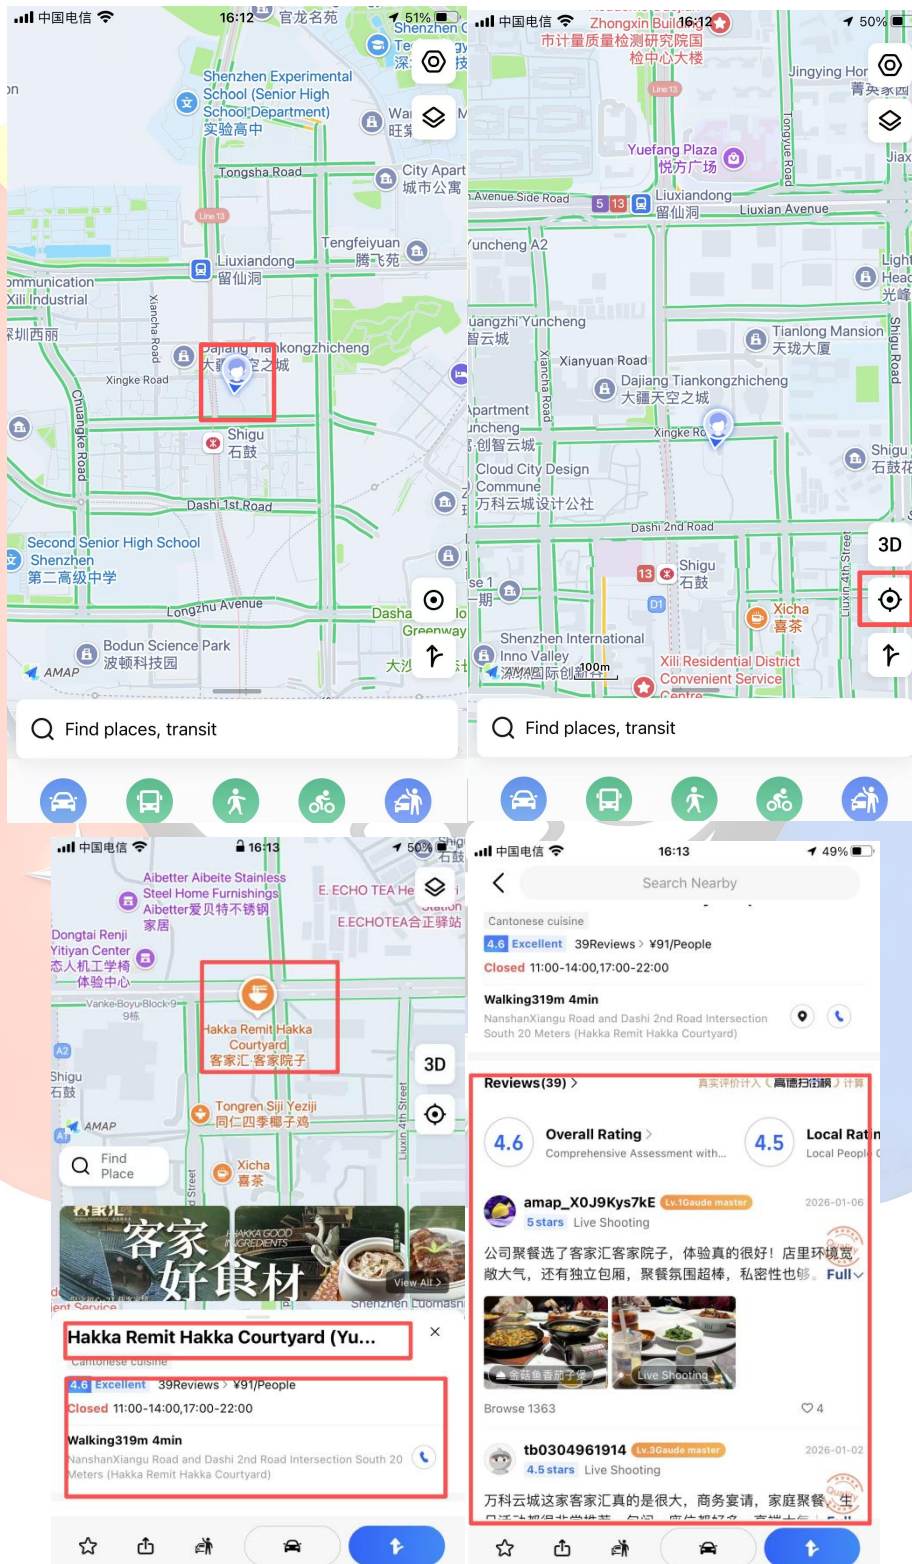

Core Features: Display subway map in English, transfer stations, exit information (Exit A/B/C) Real-time bus arrival alerts, vehicle location tracking, Fare: Displayed in CNY (RMB), supports QR code / transit card payment

### 3. Map Browsing and Positioning

Home: Blue dot = your real-time location

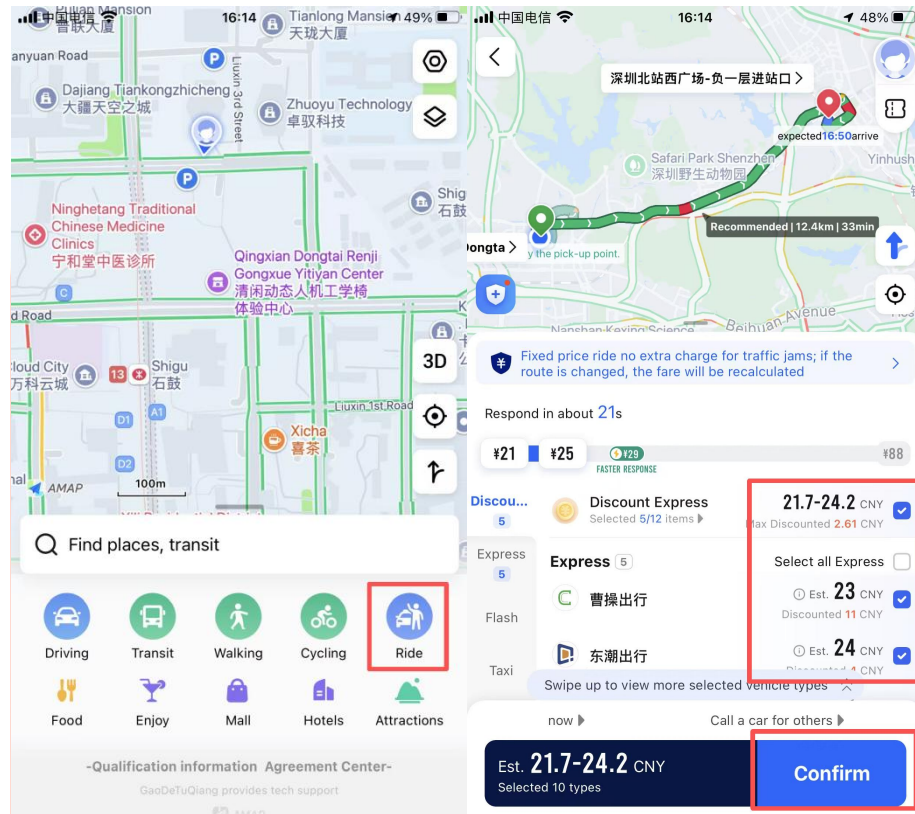

Operations: Pinch with two fingers to zoom / drag to view the map; tap the location icon to quickly return to your current location; tap a POI (place); view details (address, phone number, rating, business hours, reviews)

## 4. Taxi Feature

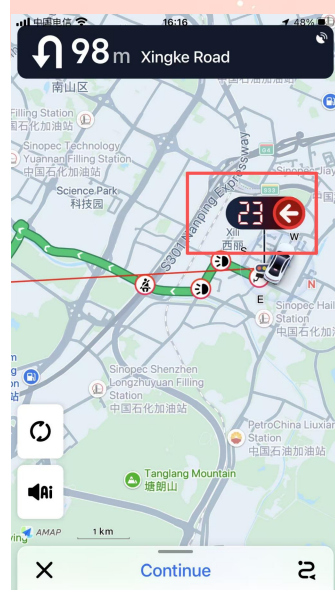

Entrance: Home Page Bottom Ride

Operation: Automatically locate the starting point, enter the destination; choose the car type (Express/Comfort Ride / Special Car); Confirm the ride; track the vehicle location, driver information, and estimated arrival time in real time.

## 5. Other Practical Features

Voice Navigation: English voice, enlarged intersection maps, lane-level guidance to avoid taking the wrong route

**Real-time traffic:** Red = Congested, Green = Smooth, Smartly avoid traffic jams

**Favorites Management:** Save frequently used locations/routes with one click, and call them directly next time
